

Respiratory Protection

Now is the time for everyone to consider getting their respiratory protection program in place. INCAA has provided a copy of our Written Respiratory Protection Plan, a PowerPoint video generally outlining respiratory protection, a test you are welcome to utilize to ensure your staff have watched the PowerPoint and some of the videos, and a list of useful videos. There are many, many more video that can found on YouTube and other sites.

INCAA is NOT making any CAA or contractor participate in creating a respiratory program. We are simply providing everyone with the very basics so, if your supervisor chooses to move forward with a respiratory program, they have a basic framework.

Anyone is welcome to take the INCAA Respiratory Protection Program and edit the document as needed to work for them.

Here is the Code of Federal Regulations for OSHA 29 CFR 1910.134-Respiratory Protection.

Please reach out to Cwillman@incap.org and Mhastings@incap.org via email for questions. Please include both of us in the email 😊
